

CIT 155 – Web Page Development

Project 3: Personal Resume Website

Project Overview

The goal of this project is to create a personal resume website that showcases your skills, experience, education, and any other relevant information. This website will serve as your personal online portfolio. It will allow you to demonstrate your understanding of HTML, CSS, and GitHub Pages, as well as how to present yourself professionally on the web.

Project Requirements

1. Basic HTML Structure

- Create a homepage for your resume with your name prominently displayed.
- Include sections for:
 - About Me – A brief introduction of yourself.
 - Education – Your educational background, including institutions attended, degrees earned, and graduation dates.
 - Work Experience – A list of your relevant job experiences (including roles, companies, and dates).
 - Skills – A list of technical and non-technical skills.
 - Contact Information – Your professional contact info (email, LinkedIn, etc.).
- Consistent navigation on each page using `<nav>` and `<a>` tags.

2. CSS Styling

- Use CSS to style your resume website with a clean and professional design.
- Ensure the website is responsive and looks good on both desktop and mobile devices.
- Implement at least one CSS layout technique (e.g., Flexbox or Grid) to position elements effectively.

3. GitHub Hosting

- Host your resume website on GitHub Pages. Ensure your website is accessible via a public URL on GitHub.

4. Bonus Points (5+)

- Add a Professional Headshot to your resume website. This should be a well-taken, professional photo of yourself placed prominently on the page.

Grading Criteria

Category	Points	Description
Functionality	50 pts	Website is fully functional, and all required sections are present and properly formatted.
Design	20 pts	Website design is clean, professional, and visually appealing. CSS is used effectively for layout and responsiveness.
Hosting	10 pts	The website is successfully hosted on GitHub Pages and accessible via a public URL.
Quality	20 pts	The website content is relevant, well-organized, and clearly presented. The information is professional and reflective of a resume suitable for potential employers.

Submission Instructions

- **Save your project folder** as Project3_YourName.
- **Compress the folder** into a .zip file. Should include any HTML, CSS, JavaScript, or images used.
- **Link to Website**

Submissions will not be accepted past the due date.
